

Miraj Patel

New York City, NY ♦ (609) 233-1335 ♦ mirajpatel2832@gmail.com ♦ [LinkedIn](#)

TECHNICAL SKILLS

Languages: Python, Java, C#, C/C++, R

Data: SQL (PostgreSQL), noSQL (mongoDB), DBT, Kafka

Web Technologies: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, Spring/Spring Boot, ASP.Net

Other: AWS, Docker, CI/CD, TCP/IP

PROFESSIONAL EXPERIENCE

Dell Technologies

Fairfax, VA

Systems Engineer through Cloudi9

August 2023 – March 2024

- Conducted thorough assessments of client demands and network structures to craft tailored server solutions during screenings, pre-site and on-site checks, achieving a **100% on-time deployment rates across hundreds of customers**
- Optimized resource utilization by implementing auto-scaling, caching, and redundancy solutions during the deployment, configurations, and testing of servers maintaining a **post deployment support request rate of 5%**
- Configured GUIs for storage servers to allow for the visualization of system performance and aggregation of logs, **decreasing incident response times by 9%**
- Strengthened client relationships as a technical contact between the sales and support team to validate infrastructure needs for the customer through effective communication, **reducing sales to deployment time by 25%** and enhancing customer confidence

B.A.P.S. Swaminarayan Temple

Robbinsville, NJ

Software Engineer

June 2022 – August 2023

- Developed and maintained a meal-sign up tracking feature for an internal tour management software using a **Java and PostgreSQL** backend for **3,000,000+ visitors annually** on average
- Provided an analytics dashboard using React and Chart.js, presenting insights on meal trends, **improving the budget allocation** for meal planning, **reducing meal waste by 15%, saving an average of \$10,500 monthly**
- Implemented real-time event streaming with Kafka to provide immediate tour status update notifications for volunteers, **increasing volunteer efficiency by 30%**

The Collegian

Richmond, VA

Web & Application Developer

September 2021 – December 2022

- Collaborated with journalists and designers to obtain requirements used to develop modern and websites using **React and Node**
- Enhanced SEO through SSR, lazy loading, and image optimization, **reducing page load times to 1.5 from 3 seconds on average**
- Integrated Google Analytics to track the number of page views and provide insight to stakeholders to improve user engagement, leading to a **15% increase in page views**

The Law Office of Darrell Robinson

Upper Marlboro MD

Business Technology Management Intern

May 2021 – July 2021

- Administered the management software and conducted the generation of monthly KPI reports, which showed an **increase of billable hours (+20%) and active cases (+31%)** after the integration of the software for 3 months
- Monitored the version history of documents in the software and designed intake form templates, maintaining the **integrity of client data at 98% accuracy**
- Automated reminders, follow-ups, and workflows for clients, **saving up to 8 hours of administrative work**, allowing for a streamlined work process

EDUCATION

University of Richmond

Richmond, VA

- Bachelor of Science:** Computer Science; Minor: Economics
- Related Coursework:** Data Structures, Algorithms, Discrete Structures, Econometrics, Software Systems Development, Database Systems, Human-Computer Interaction, Design and Implementation of Programming Languages

PROJECTS

Inventory Management Dashboard | Project

- Built a full-stack inventory management dashboard using Next.js, Tailwind CSS, Redux Toolkit, and Material UI Data Grid
- Developed a Node.js backend with Prisma ORM, leveraging AWS services like RDS, EC2, API Gateway, Amplify, and S3 for deployment

ELT Pipeline | Project

- Developed an ELT pipeline using Python, dbt, SQL, and Docker to process datasets for *Rumors, Money, and Movies*, a podcast channel about the film industry
- Designed and implemented a Dockerized PostgreSQL database environment, reducing setup time by 50%, creating reporting workflows, and ensuring data accuracy
- Implemented reusable SQL macros, strategic data filtering, and optimized joins, resulting in a measurable improvement in query performance and data processing speed

MIPS Assembler and Processor | Project

- Designed and wrote 800+ lines of object oriented C++ which reads a file written in assembly and then outputs a binary translation/machine code of the MIPS instructions
- Assembled machine code using object oriented programming to encapsulate methods, attributes, and data structures like Hashmaps and Array
